Cost of NSW Northern Rivers Storms

As of today, the number of claims received by the general insurance industry for the January 2008 severe storms impacting the NSW Northern Rivers region is 1,500.

“The estimated cost of these claims is \$10 million. As further claims are received this estimate will be updated by the general insurance industry.” Chief Executive of the Insurance Council, Ms Kerrie Kelly said.

The Insurance Council urges all policyholders to lodge their claim with their insurance provider as soon as possible to allow the claims process to begin.

The Insurance Council also reminds policyholders that all claims are assessed on a case by case basis and any queries should be directed to your insurer for clarification.
